

Andres Felipe Orjuela Arias

Bogotá, Colombia | [itsfelipe-dev.github.io](https://github.com/itsfelipe-dev) | linkedin.com/in/itsfelipe

Summary

Results-driven Data Engineer with close to 4 years of experience designing and delivering scalable ETL/ELT pipelines, data warehouses, and cloud-based data platforms in regulated Banking, Finance, and Healthcare environments. Proven expertise in PySpark, Python, SQL, AWS Glue, and Hadoop ecosystems, with hands-on experience migrating on-premise Hadoop/Hive workloads to cloud infrastructure (AWS, Azure). Track record of measurable impact: 70% faster API data extraction, 50% reduction in operational workload through automation, and 50% improvement in pipeline processing time via SQL-to-PySpark migration. Skilled in Data Quality, Apache NiFi, Apache Airflow, and building integration layers optimized for Power BI and executive dashboards. Currently expanding expertise in AI/LLM and Retrieval-Augmented Generation (RAG) solutions on Microsoft Azure. Scrum-certified with strong delivery focus in agile, cross-functional teams.

Experience

Data Engineer Semi Sr, Inetum – Bogotá, Colombia Mar 2026 – present

- Migrated legacy SQL databases to an AWS S3 Data Lake, designing distributed ETL pipelines with AWS Glue and PySpark to optimize performance and scale massive data processing.
- Built and implemented data models in PySpark, transforming raw data into structured layers (Silver/Gold) for strategic business analysis.
- Designed analytical architectures on AWS Athena and S3, creating dashboards and final reports enabling queries on large-scale datasets.
- Implemented Data Governance policies and Data Quality controls within PySpark and AWS Glue pipelines, ensuring consistency, traceability, and reliability of information in the Data Lake.

Data & AI Consultant, Independent AI & Data Consultant – Remote Nov 2025 – Feb 2026

- Provided independent data consulting services, applying ETL pipeline design and automation techniques to optimize operations and reporting workflows.
- Designed and automated data processes using Python and SQL, improving operational efficiency for business stakeholders.

Data Engineer – AI & Cloud Solutions, GJX – Bogotá, Colombia Feb 2025 – Nov 2025

- Led the end-to-end design and implementation of AI data pipelines on Microsoft Azure, integrating Large Language Models (LLMs) and Retrieval-Augmented Generation (RAG) to improve accuracy and relevance in production environments.
- Built scalable data transformation workflows using Python and Pandas to process large volumes of structured and unstructured information.
- Developed cloud solutions covering the entire project lifecycle: requirements gathering, design, deployment, and production monitoring.
- Conducted executive presentations, technical demos, and workshops, connecting business needs with production-ready technical solutions.

Cybersecurity Competitor – WorldSkills Lyon 2024 | Technical Mentor, Servicio Nacional de Aprendizaje (SENA) – Bogotá, Colombia May 2024 – Dec 2024

- Selected as top Cybersecurity competitor in Colombia after regional and national evaluations, representing Colombia at WorldSkills 2024 in Lyon, France.
- Competed in high-pressure simulated cybersecurity environments, demonstrating advanced technical problem-solving and adaptability under international competition conditions.
- Contributed to talent development for WorldSkills Shanghai 2026 by mentoring the next generation of competitors, sharing methodologies and best practices in cybersecurity.

Big Data Developer – ETL, Bluetab América (an IBM Company) – Bogotá, Colombia Apr 2023 – May 2024

- Designed and implemented ELT pipelines on AWS (AWS Glue + PySpark) and on-premise Hadoop clusters (Spark + Control-M), processing large volumes of financial data across multiple sources.
- Automated data extraction from REST APIs using Python and concurrent programming, achieving 70% faster ingestion with improved scalability for high-volume data loads.
- Developed Python and Bash automation scripts reducing team operational workload by 50%, freeing capacity for high-value engineering tasks.
- Enforced Data Quality standards using PySpark and Pandas at every pipeline stage, ensuring data integrity and reliability in compliance with banking Data Governance and Risk Appetite protocols.
- Participated in full-lifecycle delivery of critical financial data projects under Scrum methodology, using Git, Bitbucket, and Jenkins for CI/CD.

Big Data Consultant, 2NV – Bogotá, Colombia Feb 2022 – Apr 2023

- Designed and implemented Big Data pipelines for financial clients using Spark, Hadoop, Hive, Impala, SQL, and Python, supporting analytics at scale.
- Built multi-source ingestion pipelines with Apache NiFi from MySQL, SQL Server, Oracle, SFTP, AWS S3, and REST APIs; applied PySpark data quality transformations and loaded data to HDFS in Parquet format for Hive and Impala analysis.
- Migrated critical data pipelines from SQL to PySpark, achieving 50% reduction in processing time and significantly improving operational efficiency.
- Optimized Impala query performance, increasing speed and reliability of analytical workloads for BI consumers.
- Collaborated with BI teams to design Hive/Impala data schemas specifically optimized for Power BI dashboards and executive reporting.
- Automated scheduled reports and email delivery via crontab, providing stakeholders with timely, reliable business intelligence.
- Enhanced data warehouse quality using advanced PySpark data cleaning and validation techniques.

Education

Ucompensar, Bachelor in Software Engineering – Bogotá, Colombia Dec 2023 – Dec 2026

Servicio Nacional de Aprendizaje (SENA), Associate (Technologist) in Information Systems Analysis and Development – Bogotá, Colombia Apr 2021 – Jan 2023

Servicio Nacional de Aprendizaje (SENA), Vocational Technician in Computer Systems – Bogotá, Colombia Jan 2019 – Nov 2020

Certifications

Secure Development Net4skills (Apr 2026 - Apr 2028)

Azure AI Engineer Associate – Microsoft (Jun 2025 – Jun 2026)

Scrum Fundamentals Certified (SFC) – SCRUMstudy (May 2024)

SQL Intermediate Certificate – HackerRank (Mar 2024)

The Complete Hands-On Apache Airflow – Udemy

International Seminar on Artificial Intelligence and Governance – University of Chile

Projects

News Data Emotion Analyzer ELT

2024 – present

Scalable news data platform built on a modern lakehouse architecture, supporting multi-source ingestion, normalized data models, and ML-ready datasets for sentiment and emotion analysis.

- Designed and implemented end-to-end ELT pipelines using PySpark and Delta Lake, enabling reliable ingestion and transformation of news data from multiple sources at scale.
- Orchestrated pipeline workflows with Apache Airflow, ensuring fault-tolerant, scheduled, and monitored data processing across all stages.
- Architected a normalized lakehouse model on AWS following medallion architecture principles (Bronze
- Silver
- Gold), optimizing data quality and analytical performance.
- Engineered ML-ready datasets for downstream sentiment and emotion analysis, applying feature engineering and data quality validation techniques.

Awards

WorldSkills Lyon 2024 – International Cybersecurity Competitor (Sep 2024): Represented Colombia at WorldSkills 2024 in Lyon, France, one of the most prestigious international technical skills competitions, after winning consecutive national championships.

1st Place – WorldSkills National Championship, Cybersecurity (Nov 2023) – SENA: Won the national title in the Cybersecurity category at WorldSkills Colombia 2023, qualifying as Colombia's official representative for the international competition.

1st Place – WorldSkills Regional Championship, Cybersecurity (May 2023) – SENA: Won first place at the Distrito Capital (Bogotá) regional competition in the Cybersecurity category, advancing to the national championship.

1st Place – SENASOFT 2021 National Championship, Cybersecurity (Oct 2021) – SENA: Won the national cybersecurity championship organized by SENASOFT 2021, establishing an early track record of elite technical competition performance.

Skills

Languages & Querying: Python, SQL, PySpark, Bash

Big Data & Processing: Apache Spark, Hadoop, Hive, Impala, HDFS, Parquet

Cloud Platforms: AWS (Glue, S3), Microsoft Azure (Azure Storage, Azure Container Instances, Azure OpenAI)

Pipeline & Orchestration: ETL/ELT, Apache NiFi, Apache Airflow, Control-M, Apache Oozie

Containers & Databases: Docker, Azure Container Instances, PostgreSQL

AI & ML: LLMs, Retrieval-Augmented Generation (RAG), LangGraph, LangChain, Azure AI Agents, Azure OpenAI

Data Quality & Governance: Data Quality Automation, Data Governance, Risk Appetite Frameworks, Pandas

DevOps & Version Control: Git, Bitbucket, Jenkins, Terraform, CI/CD

Visualization & Reporting: Power BI, Executive Dashboards, Data Modeling

Methodologies: Scrum (Certified), Agile, Stakeholder Management

Languages: Spanish C2, English B2+
